DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a node device comprising: input units for respectively inputting data from transmission lines, output units for respectively outputting data to transmission lines; and a first switching unit for switching the data input from input units to output units, classified in class 370, subclass 351.
 - II. Claim 11, drawn to an overhead information transmission method performed by a node device, comprising steps of: storing ring construction information and transmitting topology information, squelch information and switching information via transmission lines on the basis ring construction information, classified in class 370, subclass 254.
 - III. Claim 12, drawn to a switching information transmission method comprising steps of storing data which determines to send to which of plurality of networks switching information indicating that switching processing is to be performed when trouble occurs in a transmission line, detecting trouble in the transmission line that input data into node device, classified in class 370, subclass 216.

Inventions groups I, II and III are related as subcombinations disclosed as usable together in a single combination. However, groups I, II and III belongs in

Art Unit: 2666

separate subclass of class 370, as such requires separate search scheme.

Group I is related to Routing and Switching, group II is related to Network Configuration and Topology and group III is related to Fault Recovery.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
